

FP FORESIGHT UK INFRASTRUCTURE INCOME FUND

Targeting annual income of 5% through active management of UK listed renewable energy and infrastructure investment companies.

INVESTOR GUIDE

This Investor Guide is a financial promotion for the purposes of the Financial Services and Markets Act 2000 and should only be read in conjunction with the FP Foresight UK Infrastructure Income Fund Prospectus published December 2017 and updated May 2018. Your attention is drawn to the important risk warnings contained therein. Words and expressions defined in the Prospectus shall have the same meaning in this Investor Guide.

MARCH 2019

Why Infrastructure for Low Equity Correlation, Low Volatility and Sustainable Growth?

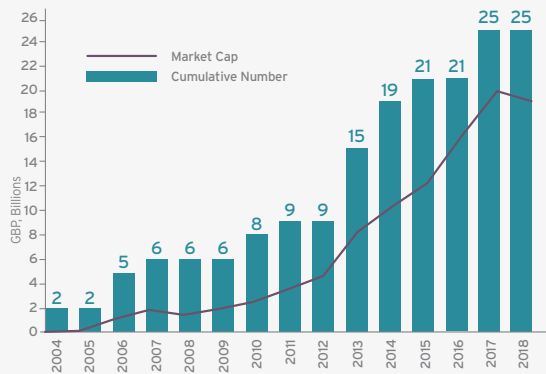

Infrastructure assets provide essential services that allow the global economy to function. In the UK, they are broadly split into six sub sectors.

Revenues from infrastructure assets are, for the most part, uncorrelated to global markets and, in many cases, are indexlinked; offering a degree of inflation protection.

The global and UK energy market is undergoing a once-in-a-lifetime upheaval, opening up opportunities across generation and flexible grid infrastructure such as energy storage, transmission and distribution. As a result, the UK

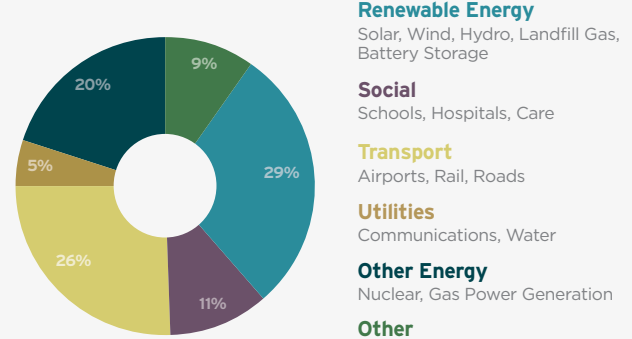

has seen unprecedented growth in renewable energy and infrastructure investment over the last five years that is forecast to continue into the foreseeable future. Much of this investment has come from UK listed renewable energy and infrastructure investment companies, of which there are more than 25 with combined market capitalisation worth more than £20bn.

Fund Performance

The Fund has significantly outperformed UK equity markets during the first year of operation with lower volatility.

FIIF Performance to November: FIIF vs FTSE All-Share

- The Fund's performance relative to the wider equity markets during the first year of operation has demonstrated the defensive qualities of the strategy
- With an equity beta of c.0.20 and volatility of less than 5%, the Fund has significantly out-performed the UK equity markets since launch and provided its investors with downside protection during both the February and October stock market corrections in 2018
- The Fund remains well positioned in 2019 to offer investors to attractive risk-adjusted returns from infrastructure and renewable energy cashflows that have historically had low correlation to equity markets

Notes: 1) Bloomberg Attribution Analysis

Capital invested is at risk. The value of an investment in FIIF, and any income from it, can fall as well as rise. The opinions stated on this page may change and should not be seen as advice or a recommendation. Past performance is not a reliable indicator of future results.

Five Key Reasons to Invest in the FP Foresight UK Infrastructure Income Fund

The Fund is actively managed and invests in UK listed renewable energy and infrastructure investment companies with a target annual income of 5% per annum paid through quarterly dividends.

We believe there are five key reasons why investors might wish to consider the FP Foresight UK Infrastructure Income Fund for their portfolio:

1. True Diversifier

The Fund had a very low equity beta of 0.20 in its first year from investments in long-dated, government backed cashflows that are not cyclically sensitive. The Fund is designed to act as a 'shock absorber' in portfolios as it is largely uncorrelated to equities, fixed income and other asset classes.

2. Inflation and Rising Interest Rate Protection

UK listed renewable energy and infrastructure investment companies can often benefit from protection against inflation due to the high proportion of underlying asset revenues which are directly linked to inflation.

3. UK Listed Real Renewables & Infrastructure

Renewable energy and infrastructure are attractive asset classes as they are characterised by stable and predictable demand, high barriers to entry and long term contracted revenue streams. The UK has been consistently assessed as one of the most attractive countries for renewable energy and infrastructure investment.

4. Low Volatility

The Fund delivered annualised volatility in its first year of just 4.60% which is less than half the volatility of UK equity markets during the same period. The purity of the Fund's strategy, only to invest in real asset owning investment companies, delivered price stability in the first year.

5. Compatible with Ethical and Sustainable Investment Objectives

Compatible with Ethical and Sustainable Investment Objectives Investments into infrastructure and renewable energy offer investors an opportunity to finance the transition to a green economy and invest in assets that provide essential services to communities.

IMPORTANT INFORMATION

This has been approved as a financial promotion for the purposes of Section 21 of the Financial Services and Markets Act 2000 by Foresight Group LLP ("Foresight Group"). Foresight is authorised and regulated by the Financial Conduct Authority. Its registered office is The Shard, 32 London Bridge Street, London SE1 9SG (FCA number 198020). Foresight Group is a subsidiary undertaking of Foresight Group CI Limited ("Foresight CI"), a private company registered in Guernsey (registered number 51471). Its registered office is Ground Floor, Dorey Court, Admiral Park, St Peter Port, Guernsey GY1 2HT. Foresight CI, Foresight Group and their subsidiary undertakings and associated companies are referred to herein as "Foresight". FP Foresight UK Infrastructure Income Fund ("the Fund") is an open-ended investment company incorporated with limited liability and registered in England and Wales under registered number IC001100 and is a UCITS scheme. FundRock Partners Limited is the authorised corporate director of the Fund and Foresight Group is the investment manager. We recommend investors seek professional advice before deciding to invest. Investors must read the Fund Prospectus ("Prospectus") and Key Investor Information Document ("KIID"), dated December 2017, before making an investment decision. These documents are available at www.foresightgroup.eu. Particular attention should be paid to the risk factors set out in the Fund Prospectus. Words and expressions defined in the Prospectus shall have the same meaning in this Investor Factsheet. Foresight does not offer investment or tax advice. The value of an investment in the Fund, and any income from it, can fall as well as rise. Investors may not get back the full amount they invest. Past performance is not a reliable indicator of future results. Personal opinions may change and should not be seen as advice or a recommendation. There are a number of other risks connected to an investment in the Fund, including (but not limited to) counterparty risk, liquidity risk and volatility. These risks are explained in the Fund Prospectus. Past performance is not a guarantee of future performance. The Fund focuses on the UK renewable energy and infrastructure sector only and will have a less diverse portfolio than the average OEIC. Infrastructure companies may be subject to factors that may adversely affect their performance. The Fund may be suitable for investors seeking exposure to the renewable energy and infrastructure asset class with a UK focus. An investor should be willing to invest for the medium to long term (five years) to gain access to a portfolio managed in accordance with an investment objective and policy which targets income from infrastructure assets. Investors must be prepared to accept fluctuations in the capital value of their investment, including possible capital loss and the risks of investing in equity markets. We respect your privacy and are committed to protecting your personal data. If you would like to find out more about the measures we take in processing your personal information, please refer to our privacy policy, which can be found at <http://www.foresightgroup.eu/privacy-cookies/> **Capital is at risk.
