

FACTSHEET

30 June 2019

Launched in December 2017, the FP Foresight UK Infrastructure Income Fund (“the Fund” or “UK FIIF”) is an actively managed, Open Ended Investment Company (“OEIC”) with daily dealing.

INVESTMENT OBJECTIVES

- To manage the Fund actively and take advantage of opportunities in the renewable energy and infrastructure sectors.
- To provide an annual income, targeting 5% to be paid through quarterly dividends, with the possibility of capital growth.

INVESTMENT POLICY

- Adopt a “Fund of Investment Companies” approach, investing in listed investment companies.
- Achieve a high degree of diversification across the renewable energy and infrastructure sectors and underlying asset exposure.
- Target an underlying portfolio characterised by long term contracted revenue streams often with a high degree of inflation linkage.
- Invest in companies that demonstrate low volatility and less correlation to market cycles than other equities.
- Provide investors with a sustainable yield by facilitating quarterly dividend distributions.
- Active management of the portfolio to maximise income over the long term.

MANAGEMENT COMMENTARY

June was a month of solid performance for the Fund, generating a positive return of 1.65%. The Fund's non-UK holdings were particularly strong contributors to performance, with good share price performance from Infratil ("IFT"), Landmark Infrastructure Partners ("LMRK") and Hannon Armstrong Sustainable Infrastructure ("HASI"), the price of which increased 8.5% in the month. HASI is dedicated to making investments that reduce carbon emissions or increase resilience to climate change and, in particular, is benefitting from the growing number of opportunities arising in the energy efficiency and renewables markets in the US.

June was also a good month of capital raising by some of the UK investment companies in the portfolio. Sequoia Economic Infrastructure Fund ("SEQI"), which invests in income-generating economic infrastructure debt, raised £263m in a heavily over-subscribed equity placing. The proceeds of the fundraise will be used to invest into a number of attractive opportunities that should generate robust returns. GCP Asset Backed Income Fund ("GABI") also raised £63m of equity capital. The Fund was able to secure a substantial allocation of shares in both of these placings, at prices materially below the prevailing share prices. This was a further driver of portfolio performance in the month.

FIIF continued to benefit from strong fundraising momentum and, in the period, secured a further £44.6m of capital. At the month end, the Fund NAV totalled £291.3m.
