FOR A SMARTER FUTURE

FP FORESIGHT GLOBAL REAL INFRASTRUCTURE FUND

Factsheet | 31 October 2020

Actively managed by the award-winning Foresight Capital Management, FP Foresight Global Real Infrastructure Fund (“the Fund” or “GRIF”) invests in global real infrastructure.

INVESTMENT OBJECTIVES

- To provide growth of more than 3% per annum above the rate of UK inflation (CPI) over any five-year period and provide investors with quarterly dividend distributions.
- To invest only in companies that we believe deliver a net social or environmental benefit and meet the principles of the United Nations Global Compact.

INVESTMENT PHILOSOPHY

- Invest exclusively in the publicly traded shares of companies that own or operate real infrastructure or renewable energy assets across the world.
- Provide investors with a globally exposed portfolio with a low correlation to equity market cycles and which delivers a steady return.
- Invest in companies that provide essential services allowing the global economy to function in a sustainable manner while also addressing changing social and demographic requirements.
- Target an underlying portfolio characterised by long-term contracts with highly credit worthy counterparties and which benefit from inflation linkage.
- Regularly monitor the portfolio companies against a predefined set of criteria to ensure they continue to meet our sustainability requirements.

RISK AND REWARD

The Fund has been classified “5” on the Synthetic Risk and Reward Indicator in the Key Investor Information Document.

MANAGEMENT COMMENTARY

In October 2020, the Fund delivered a strong defensive performance with a total return of -0.52% (net of foreign exchange), outperforming global equities by 1.94%. Year to date, the Fund has delivered a strong positive performance with a total return of 14.16%, continuing to materially outperform global equities (FTSE All World USD -0.89%) and UK equities (FTSE All Share -22.91%). Since inception, the Fund has delivered a +31.00% total return, outperforming global equities by 13.66% and UK equities by 46.89%. The Fund has achieved this performance with a lower volatility than the equity indices.

The Fund portfolio continues to generate positive news from underlying investment activity. Previously, the investment team announced the addition of Cellnex Telecom, a €25bn Spanish-listed owner of communications infrastructure, to the portfolio. Cellnex has delivered strong early performance and has immediately demonstrated the ability to add significant value through the acquisition of a 60% stake in a 7,000 telecommunications tower portfolio in Poland. This was Cellnex’s first deal in Poland and increases the portfolio size to 73,000 sites across nine countries. This addition contributes to contracted cash flows and leaves the Fund well-positioned to benefit from anticipated 5G trends. There was further acquisition activity in the Fund’s renewable energy holdings during the month as Scatec Solar announced a \$1.17bn acquisition of Norfund’s hydro business. The addition of hydro offers Scatec Solar technological diversification and increases global reach. The Fund also acquired shares in Greencoat Renewables from The Ireland Strategic Investment Fund, following an accelerated book build offering. The Fund secured the Greencoat shares at €1.15 per share, a discount to the market price of €1.22.

Sterling appreciated slightly during October 2020, from 1.292 vs. the US dollar at the start of the month to 1.295 at month end. The portfolio remains well diversified from a currency and geographical perspective and continues to achieve the investment objective of CPI+3% annually over the medium term.

The Fund saw net inflows of €33m during the month, taking 2020 net inflows to £217m.
